The following is an examiner's statement of reasons for allowance:

The prior art US patent 6,693,138 teaches a process for reducing carbon dioxide emissions from Fischer-Tropsch facility by reforming naphtha to produce a by-product hydrogen containing gas stream and feeding the hydrogen containing gas stream into the synthesis gas formation reactor to convert a portion of carbon dioxide in the feed stream into additional carbon monoxide by a reverse water gas shift reaction. However this reference neither teaches nor suggests recovering a hydrogen rich gas stream from at least one of the syngas and the by-product hydrogen-containing gas stream or combination thereof; and using a hydrogen rich fuel comprising the hydrogen rich gas stream and the unreacted gas in at least one furnace in the gas to liquid facility to reduce the carbon dioxide emissions generated by the facility.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jafar Parsa whose telephone number is (571)272-0643. The examiner can normally be reached on 8 a.m.-4:30 p.m. (M-F).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on (571)272-0646. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
